Summary

Results-driven **Full-Stack Software Developer** specializing in secure, scalable web applications and AI projects, including handwriting extraction and automated grading. Expertise in team leadership, API design, agile practices, and continuous integration. Skilled in software development methodologies and project management, with a strong track record of troubleshooting complex issues and delivering effective solutions.

Skills

- Python
- JavaScript and TypeScript
- HTML5 and CSS3
- React
- Node.js and Express.js
- RESTful API Design and Implementation
- Version Control (Git)
- Microservices Design Principles
- CI/CD (Continuous Integration and Deployment)
- Unit testing
- SQL and NoSQL Databases
- Automated AI/ML integrations
- Cloud Platform Development
- OOP (Object-Oriented Programming)
- Data Structures and Algorithms
- Responsive Web Design
- Overall Full-Stack Development Skills
- Automated Testing Solutions Implementation

Experience

Full-Stack Software Engineer Intern | Real Men Apparel | 11/2024 - Current

- Developed automated email outreach to engage customers within 24 hours, boosting team efficiency by 80%.
- Refactored database extraction and rewriting processes, enhancing performance by 75%.
- Integrated e-commerce APIs and platforms, reducing tracking errors and data discrepancies by over 40%.
- Analyzed code and resolved errors, enhancing output quality.
- Facilitated weekly live coding sessions, improving collaboration and project alignment.

Branch Manager / Website Administrator | Agri Trails Coop - Pearl, USA | 01/2020 - Current

- Directed marketing campaigns with internal and external partners, resulting in increased website traffic.
- Utilized data analytics to identify engagement trends, enhancing site performance.
- Developed comprehensive website content, including text, graphics, audio, video, and animations, to engage users effectively.
- Managed regular updates of website content, enhancing digital presence of Agri Trails Coop.
- Maintained software applications, such as content management systems and e-commerce platforms, effectively.

Full-Stack Software Engineer Intern | Kangaroos AI | 03/2025 - 06/2025

- Engineered secure, scalable cloud infrastructure on GCP and Firebase, maintaining 98% uptime.
- Enhanced cloud system performance by 25%, resulting in a 20% rise in operational efficiency through targeted improvements.
- Developed AI document extraction platform for diverse file types, achieving 95% accuracy while adhering to stringent security protocols.
- Deployed AI grading system that cut manual review time by 40% while improving feedback accuracy.
- Collaborated with design teams to define data structures and enhance system architecture for improved functionality.

Education

Coding Temple | Remote | 10/2024

Certificate: Full-Stack Software Engineering

- Software Engineering: [Certificate of Completion](#)
- Software Engineering: [Backend Specialist](#)
- Software Engineering: [Backend Core](#)
