

DANIEL DURANT

Full-Stack Software Developer

dannyjdurant@gmail.com | Junction City, KS | [LinkedIn](#) | [Portfolio Website](#) | [GitHub](#)

Summary

Full-Stack Software Developer with two years of experience delivering secure, scalable solutions across e-commerce and AI/ML applications. Proven success architecting cloud-based systems and shipping AI features such as handwriting extraction and automated grading. Known for transforming ambiguous, high-complexity problems into clear, reliable systems that teams can build on with confidence.

Skills

- Python
- JavaScript & TypeScript
- HTML5 & CSS3
- React
- Node.js & Express.js
- RESTful API Design & Implementation
- Microservices Design Principles
- CI/CD (Continuous Integration and Deployment)
- Unit testing
- SQL & NoSQL Databases
- Automated AI/ML integrations
- GCP (Google Cloud Platform)
- OOP (Object-Oriented Programming)
- Data Structures & Algorithms
- Git (Version Control)

Experience

Full-Stack Software Engineer Intern | Real Men Apparel | 11/2024 - Current

- Developed automated email outreach to engage customers within 24 hours, boosting team efficiency by 80%.
- Refactored database extraction and rewriting processes, enhancing performance by 75%.
- Integrated e-commerce APIs and platforms, reducing tracking errors and data discrepancies by over 40%.
- Analyzed code and resolved errors, enhancing output quality.
- Facilitated weekly live coding sessions, improving collaboration and project alignment.

Branch Manager / Website Administrator | Agri Trails Coop - Pearl, USA | 01/2020 - Current

- Directed marketing campaigns with internal and external partners, resulting in increased website traffic.
- Utilized data analytics to identify engagement trends, enhancing site performance.
- Produced comprehensive website content, including text, graphics, audio, video, and animations, to engage users effectively.
- Managed regular updates of website content, enhancing digital presence of Agri Trails Coop.
- Maintained software applications, such as content management systems and e-commerce platforms, effectively.

Full-Stack Software Engineer Intern | Kangaroos AI | 03/2025 - 06/2025

- Engineered secure, scalable cloud infrastructure on GCP and Firebase, maintaining 98% uptime.
- Enhanced cloud system performance by 25%, resulting in a 20% rise in operational efficiency through targeted improvements.
- Created AI document extraction platform for diverse file types, achieving 95% accuracy while adhering to stringent security protocols.
- Deployed AI grading system that cut manual review time by 40% while improving feedback accuracy.
- Collaborated with design teams to define data structures and enhance system architecture for improved functionality.

Education

Coding Temple | Remote | 10/2024

Certificate: Full-Stack Software Engineering with advanced backend focus
